
Top SNP-associated genes in Vibrio vulnificus
(per antibiotic, n=29 strains with WGS)
2-hydroxyacid dehydrogenase
2-octaprenyl-3-methyl-6-methoxy-1,…
4'-phosphopantetheinyl transferase…
A24 family peptidase
AsmA family protein
BatD family protein
CoA-disulfide reductase
DJ-1-PfpI family protein
DNA internalization-related compet…
DNA polymerase III subunit epsilon
DNA translocase FtsK 4TM domain-co…
DUF1853 family protein
DUF3087 domain-containing protein
DUF3379 domain-containing protein
EAL domain-containing protein
EamA family transporter
IscS subfamily cysteine desulfurase
M6 family metalloprotease domain-c…
M9 family metallopeptidase
META domain-containing protein
MSHA biogenesis protein MshP
MlaD family protein
S41 family peptidase
SMC family ATPase
TIGR01621 family pseudouridine syn…
TRAP transporter small permease su…
